

Découpage sur presses  
de pièces micromécaniques

Press punching micro-mechanical parts

Our company has been developing and manufacturing progressive stamping dies for over 45 years. A leader in our field of activity, we also produce micro-mechanical parts on high-speed presses.

To strengthen our technical department team, we are recruiting to fill the following post, to start immediately or as agreed:

## Stamping Operations Manager (Full Time)

### Role responsibilities

- Construct the stamp from the design of the part to be produced
- Create the dossiers of drawings and control files
- Manage the assigned projects from receipt of the drawing of the customer's part to type-approval of the prototypes
- Organise and lead project meetings
- Follow up technical modifications
- Monitor the tests and assist the tool mechanic in fine-tuning the tooling equipment

### Candidate profile

- Basic training with Federal Proficiency Certificate (CFC) as a micro-mechanic or equivalent
- Technical higher education institute diploma ("Technicien ES") or other training deemed equivalent
- Project management skills
- Able to work independently and integrate within a team
- Experience in stamp research and design (an advantage)
- Knowledge of spoken and written English (an advantage)

### We offer you

- Continuous training in the proposed field of activity
- A stable job involving interesting and varied work as part of a small but dedicated team
- A pleasant work environment

Interested candidates should send their CV along with copies of their diplomas and employment certificates by email to [c.meylan@meylanfreres.ch](mailto:c.meylan@meylanfreres.ch) or by post.

Only successful candidate(s) whose application(s) match the desired profile will be contacted.
